

International Symposium
on Biodiversity and Edible Wild Species

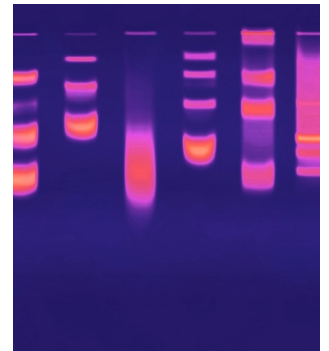

INTERNATIONAL SYMPOSIUM ON BIODIVERSITY and Edible Wild Species 03-05 APRIL 2017 ANTALYA, TURKEY

BEWS2017 covers most aspects of biodiversity including plant biodiversity, and particularly wild edible species. The Symposium is organized by the General Directorate of Agricultural Research and Policies (TAGEM) in collaboration with the GEF-funded Biodiversity for Food and Nutrition (BFN) Project. The Symposium aims to bring researchers, scientists and plant breeders together to share advances in biodiversity conservation and use and establish new collaborations. TAGEM also aims to foster innovative thinking for the utilization and conservation of plant biodiversity.

Miracle Resort Hotel
